INTRODUCTION

Use this guide if you are having troubles getting your speakers to work at optimal performance or if there is no sound coming out of your speakers at all.

🔧 TOOLS:

- Phillips #2 Screwdriver (1)
- iFixit Opening Tools (1)

This document was generated on 2020-11-28 06:55:48 AM (MST).

Step 1 — Soundbar/speaker

- Using a plastic opening tool, remove the two rubber tabs circled in red.

Step 2

- Remove both of the 8mm Phillips #2 screws from these slots where the rubber caps were removed.

Step 3

- Slide the tab to pop the battery out of its holder.

- Pull the battery out of its slot.

Step 4

- Remove the three 4mm Phillips #2 screws from the open battery slot as shown.

- Remove the two 5mm Phillips #2 screws.

Step 5

- Begin prying up on the plate as shown in the pictures.

Step 6

- Detach the single connector using your plastic opening tool.

- Remove the speaker bar.

To reassemble your device, follow these instructions in reverse order.
