

Hover-1 Horizon Power Button Replacement

Replace the power button on the Hover-1 Horizon.

Written By: Christina Fong

INTRODUCTION

Does your Hover-1 Horizon not turn off? This is a guide to show you how to replace the power button, the most likely cause of your issue. This guide requires a Phillips #2 and a Phillips #1 screwdriver.

TOOLS:

- [Phillips #1 Screwdriver](#) (1)
 - [Phillips #2 Screwdriver](#) (1)
-

Step 1 — Base Plate

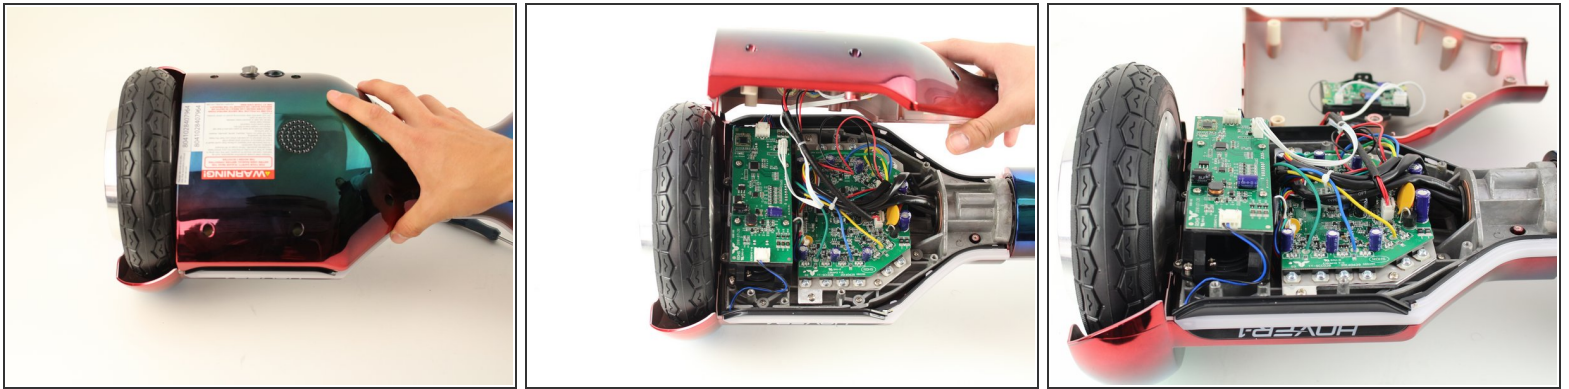

- Remove the six 12mm Phillips #2 screws holding the base plate.

Step 2

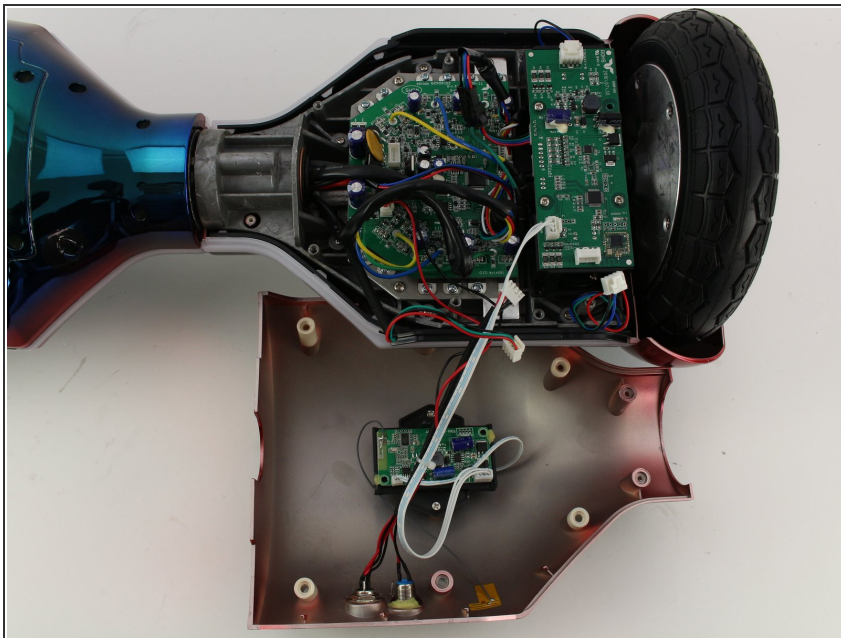

- Remove the two 11mm Phillips #1 screws that hold the base plate to the body.

Step 3

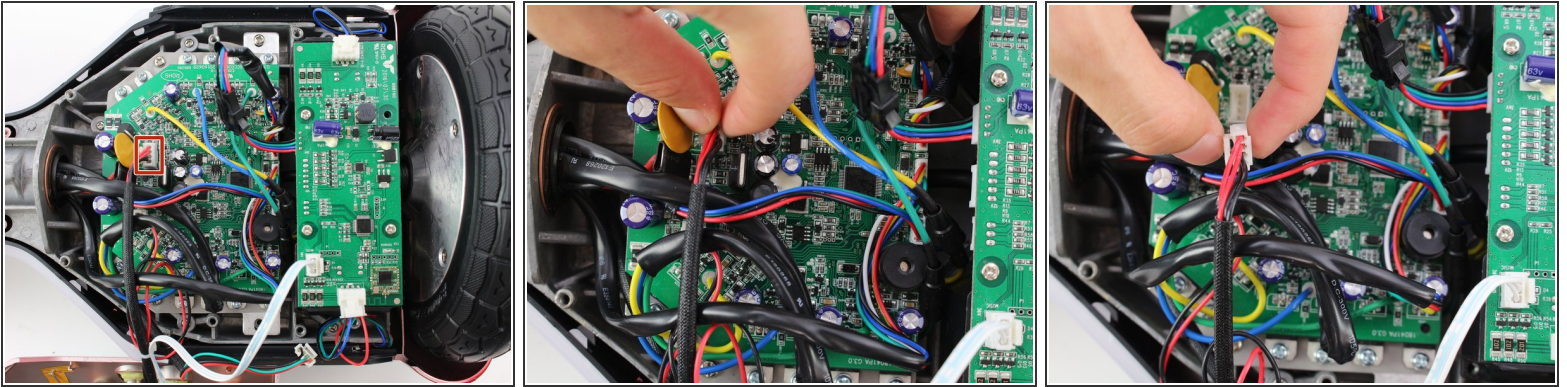

- Remove the base plate by lifting it up.
- ⓘ The base plate is connected to the body with wires. The wires are long enough to set the base plate to the side.

Step 4 — Power Button

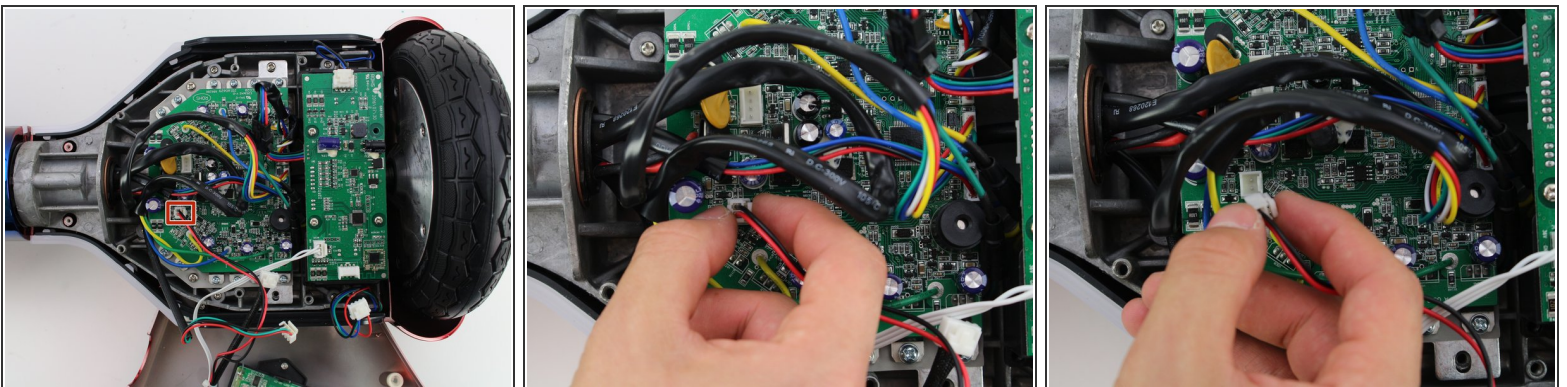

- Reorient the Hover-1 Horizon so the base plate opens towards you.

Step 5

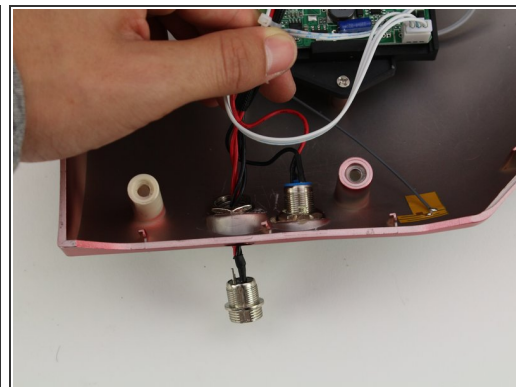

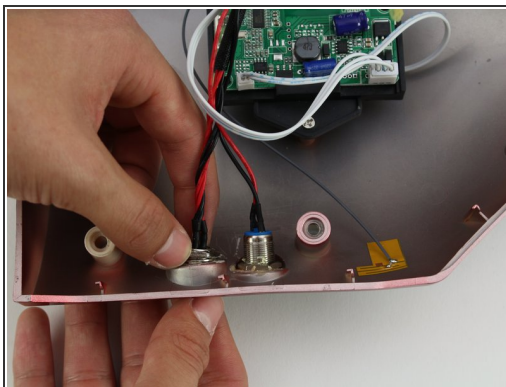

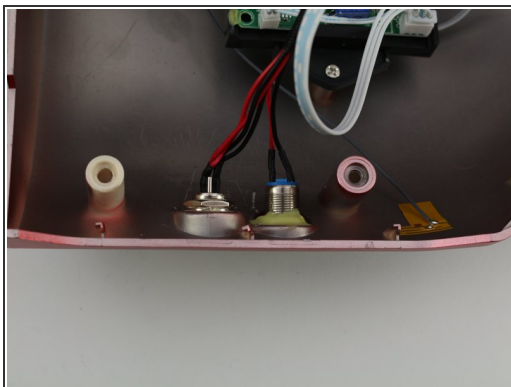

- Remove the connector by squeezing the tab and lifting up.

Step 6

- Remove the second connector by squeezing the tab and pulling up.

Step 7

- Unscrew the power button by holding the front and twisting the back nut counter-clockwise.
- Push the power button through the base plate to remove.
- ⓘ A hot air gun may need to be used to remove the adhesive connecting the base plate to the power button.

To reassemble your device, follow these instructions in reverse order.
