Step 1 — Battery

⚠️ Before beginning, make sure the laptop is completely turned off by pressing the off button and waiting for the screen to turn black.

● Flip the laptop over so the battery is exposed which will be next to the hinges on the top left and right.
Step 2

● Place your thumbs on the slide locks that are next to the hinges and simultaneously push them toward each other to unlock the battery.

● While still holding onto the slide locks, push the battery away from the laptop with your index fingers.

Step 3 — RAM

- Unscrew the 8 screws on the back cover.

- There are also two screws in the battery area that you unscrew.

Step 4

- Use an opening tool and wedge it under the edge and go around the whole laptop to help remove the back cover.

- (i) On the side of the laptop, you can see where it can be separated into two parts.

Step 5

ⓘ This laptop has one RAM.

● Gently pull out the RAM from the socket.

To reassemble your device, follow these instructions in reverse order.
