

How to wind back the EPB, electronic parking brake, to change rear brake pads

This shows how to change the rear brake pads on cars fitted with the EPB, electronic parking brake.

Written By: jon

INTRODUCTION

This shows how to change the rear brake pads on cars fitted with the EPB, electronic parking brake. It's on a Landrover Discovery Sport but is the same method on lots of cars with EPB like VW, Audi etc.

TOOLS:

- [Latex or nitrile gloves](#) (1)
 - [Craftsman hex and torx superset](#) (1)
-

Step 1 — How to wind back the EPB, electronic parking brake, to change rear brake pads

- Insert wisdom here.

Just follow the video for how to change the rear pads on cars fitted with EPB. This is on a Discovery Sport but applies to others.
