Step 3 — RAM
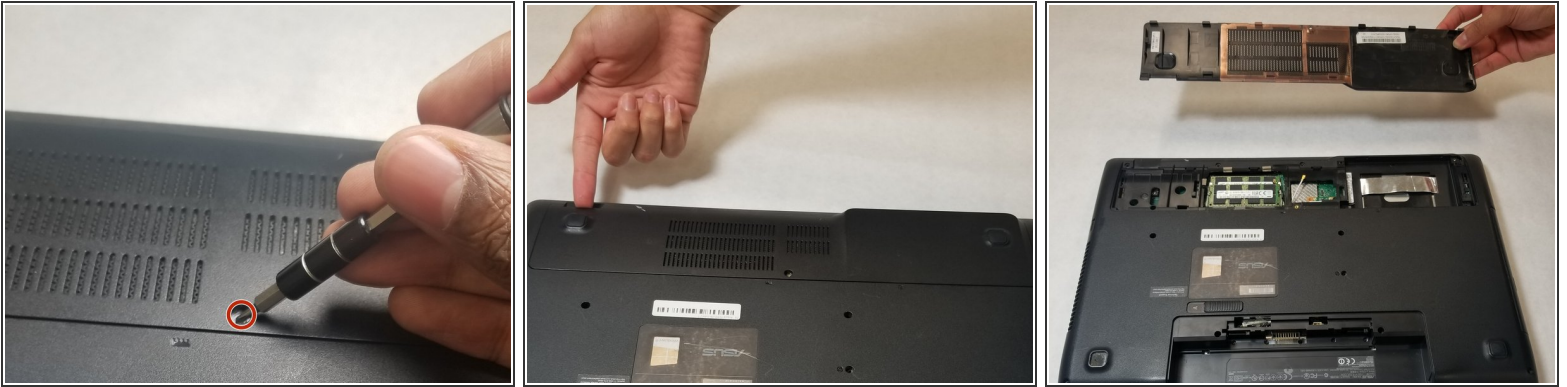

- Remove the one screw securing the back cover.

- Pry off the cover using a finger.

- (i) This device was missing its screws on the back cover when we received the device. As a result, we do not know what head type the screws are, along with their lengths.

Step 4

- Push the clips outwards using two fingers.

- Lift the RAM to remove it from the slot.

- (i) Repeat step 4 for the second RAM slot.
