INTRODUCTION

In this guide, you will learn to remove and replace the RAM of a Sony Vaio VPCEA3C5E computer.

🔧 TOOLS:

- Phillips #0 Screwdriver (1)
- Spudger (1)

This isn't needed, but greatly recommended!

Step 1 — RAM

- Remove the single Phillips #00 screw from the back cover of the laptop.

Step 2

- Lift the cover up and remove it from the computer.

Step 3
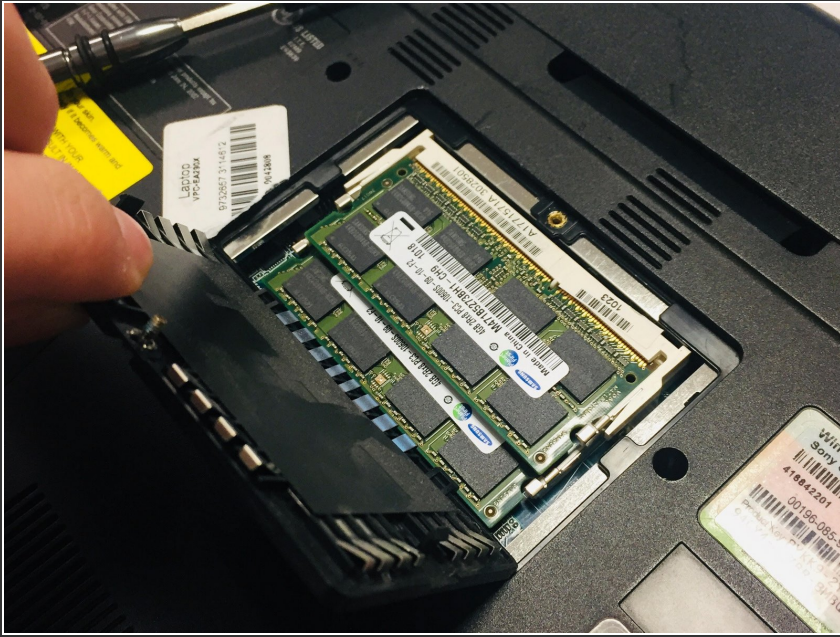

- Identify the two RAM pieces.

Step 4

- Push out the two outer white catch pieces holding the both sides of the RAM in position. Begin gently removing the RAM from its position.

Step 5

- Once you have the RAM out on its own, replace it or put it back into the correct position.

To reassemble your device, follow these instructions in reverse order.
