

# Lenovo Thinkpad T440s Back Panel Replacement

Use this guide to replace the back panel of your Lenovo Thinkpad T440s.

Written By: Terelle Montalvo

# INTRODUCTION

In order to access and replace the laptops components, the backplate must be removed. For this guide, you will need a prying tool and a Phillips #1 screwdriver. This process is not difficult but is required for most of this laptops repairs.

## TOOLS:

- [Phillips #1 Screwdriver](#) (1)
  - [Metal Spudger](#) (1)
-

## Step 1 — Back Panel

- Make sure to power down and turn off your device before proceeding with the repair.
- Flip your laptop over so that the backside is facing you.

## Step 2

- Using a Phillips #1 screwdriver, remove the eight screws securing the backplate.
- Don't try to force screws which won't come out. They are held in place by a stopper on the reverse side. This will not prevent you from removing the backplate.

### Step 3

- Using the metal spudger, wedge it in the seam where the backplate meets the front plate and run the tool along the seam to separate the backplate.

### Step 4

- Remove the back panel from the device.

To reassemble your device, follow these instructions in reverse order.
