Step 1 — RAM

- Orient the laptop so that it is closed, faced down and has the battery facing away from you.

- Use the Phillips 00 screwdriver to remove the 7.50mm screw from the panel.

Step 2

⚠ Carefully remove the cover to reveal the RAM compartment.

Step 3
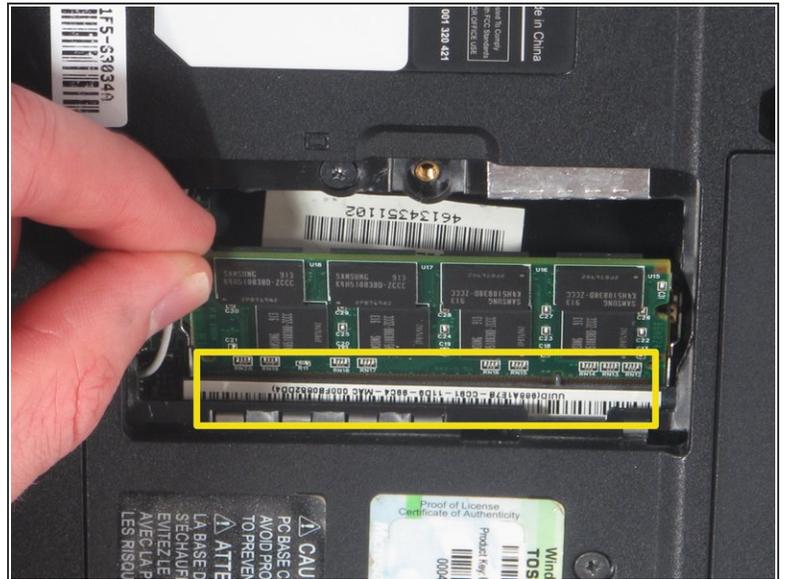

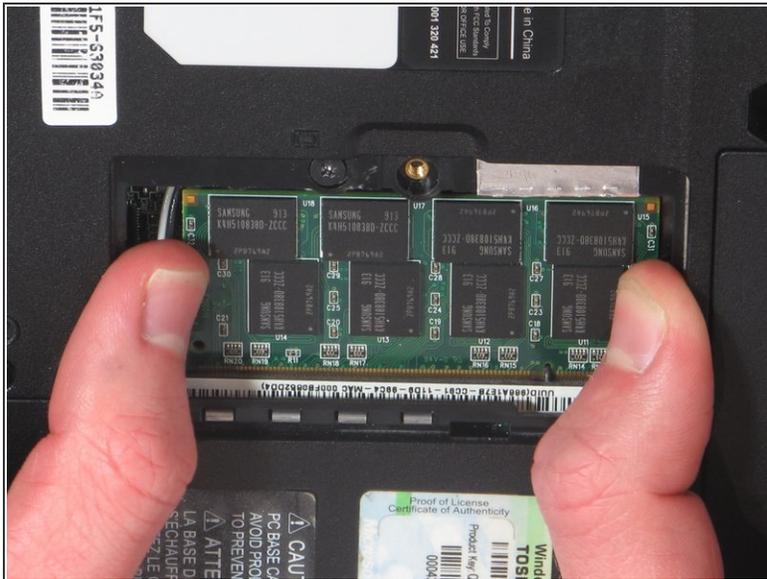

- Rotate the laptop 90 degrees clockwise.

- Pull back the two silver clips that hold the RAM in place.

- Gently pull the RAM out of the slot and lift up to remove the RAM from the laptop.

Step 4 — Optical Drive
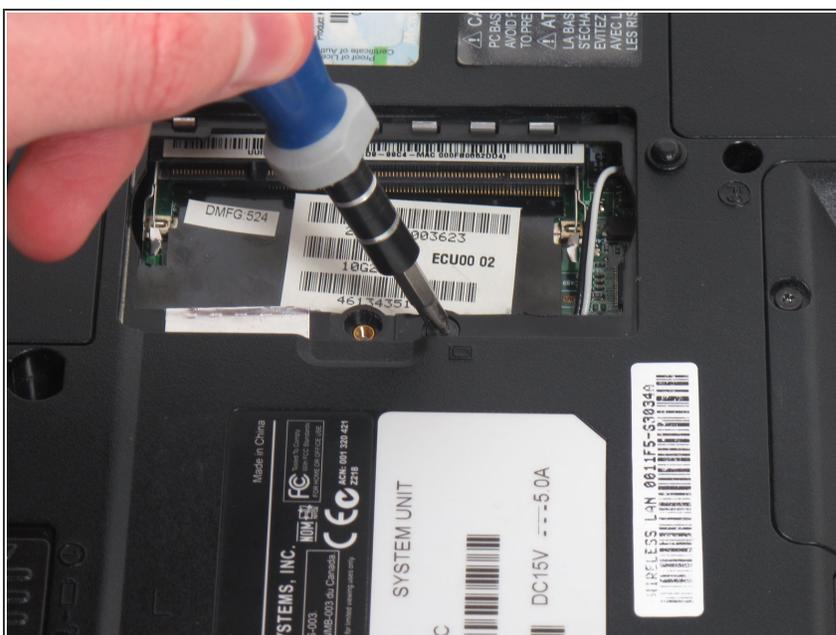

- Use the Phillips #00 screwdriver to remove the 6.50mm screw holding the gray metal bracket in place.
