

2009 Toyota Camry Cabin Air Filter Replacement

This guide will show you how to replace the cabin air filter in the 2009 Toyota Camry.

Written By: Aldo Dorado

INTRODUCTION

Use this guide to replace a cabin air filter in a 2009 Toyota Camry.

Cabin air filters are made of multi-fiber paper cotton that helps prevent dust, pollen, dirt, and other pollutants from entering the cabin through your A/C and heat vents. Any cabin filter can be used as long as it is for a 2009 Toyota Camry. It is recommended to change an air filter every 12,000-15,000. There is nothing harmful that can happen from replacing the filter. It is an easy fix that can be done in less than 5 minutes.

TOOLS:

- [Shop Towels or Rags](#) (1)

PARTS:

- [Cabin Air Filter](#) (1)

Step 1 — Cabin Air Filter

- Open the glove compartment.

Step 2

- Unhook the damper arm connected to the glove box.

Step 3

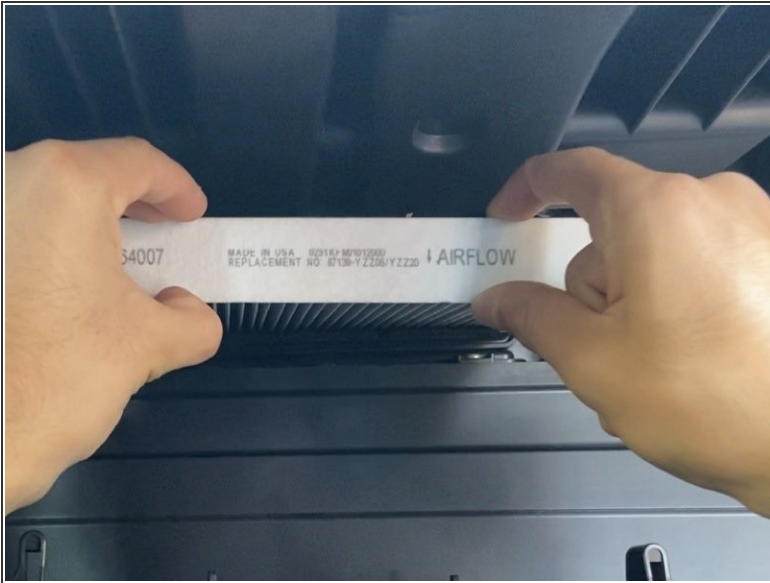

- Push in the sides of the glove box in order to take it out.

Step 4

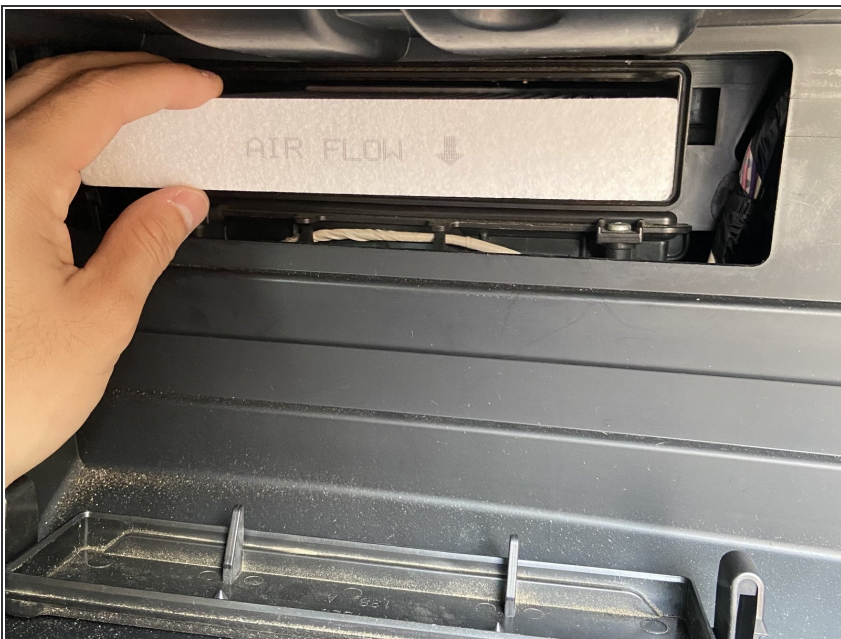

- Unclip the housing cover.

Step 5

- Take out the filter and clean around the area where the filter goes in.

Step 6

- Insert the new filter.

To reassemble your device, follow these instructions in reverse order.
