Step 1 — Charging port

- (i) Switch off the phone.
- Dissemble the phone
- Open back cover and remove the battery
- Remove the nuts with the aid of a screw driver.

Step 2

- Remove the panel and recognize where the charging port is.
- With the use of an opening tool remove the panel carefully.

Step 3

- Removing the charging port with the use of a soldering iron or hot air

Step 4

- Get you new charging port and fix it legs on the panel.

- Use hot air or soldering iron along side with a tweezers to remove the charging port.

Step 5

- Making use of the hot air not soldering iron to fix the new charging port.

- (i) You can make use of a lead wire if the lead on the panel is not enough.

- Boom you're done replacing the charging port so place the panel back, screw the nut back and juice your phone.

To reassemble your device, follow these instructions in reverse order.
