

Blackberry Curve 9300 Screen Replacement

Replace faulty screen; lines on screen

Written By: Alek Squires

INTRODUCTION

This guide was written to aid with Blackberry Curve screen replacement. Following the steps below should provide relatively simple means of achieving this goal.

TOOLS:

- iFixit Opening Tools (1)
- T6 Torx Screwdriver (1)
- Tweezers (1)

Step 1 — Battery

 Place your Blackberry face down in front of you.

Step 2

- Locate the indent on the bottom of the back cover.
- Use your fingernail to lift and remove the back cover.

 From the top, use your fingernail to lift and remove the battery.

Step 4 — Keyboard

 Use the T6 Torx screwdriver to unscrew the two 5mm screws highlighted.

Place the phone face up and use tweezers to securely grip and lift the screen upwards.

Step 6

 Use a plastic opening tool to lift the bottom edge of the front cover.

 Use your nails to unclip the sides of the frame from the phone.

Step 8

Lift and remove the frame.

Lift and remove the keyboard.

Step 10 — Screen

 Locate and remove the two 5mm screws on top of keyboard base using the T6 Torx screwdriver

- Carefully pull the keyboard base up and away from the phone.
- Disconnect the keyboard base from the phone completely.

Step 12

 Locate and remove the four 5mm screws on the top and bottom of the phone with a T6 Torx screwdriver

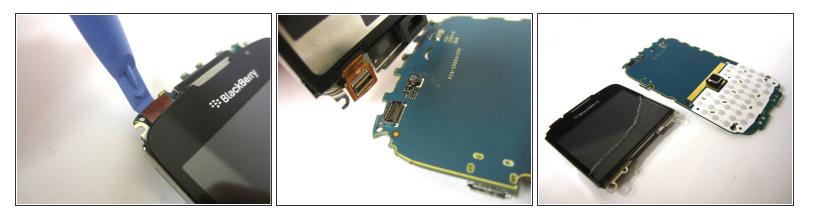

- Use a plastic opening tool to find the crease below the screen.
- Insert where shown and use the tool to unclip the two sides of screen from body.
 - (i) The opening tool goes approximately midway between the top and bottom edge of the screen.

Step 14

 From the back of the phone, use a finger to push the front piece of the phone away from the back piece.
