

Motorola V276 Small LCD Display Screen Replacement

Replacing a cracked or malfunctioning LCD display screen.

Written By: Cecilia

INTRODUCTION

Replacing a cracked or malfunctioning LCD display screen.

TOOLS:

- [iFixit Opening Tools](#) (1)
 - [T6 Torx Screwdriver](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Front panel/ Screen Logic Board

- Using the plastic opening tool, pry off the top faceplate.
- Place the tool in the small crack that runs along the side of the phone and pry.

Step 2

- Using the T6 Torx Screwdriver remove all 4 small screws.

Step 3

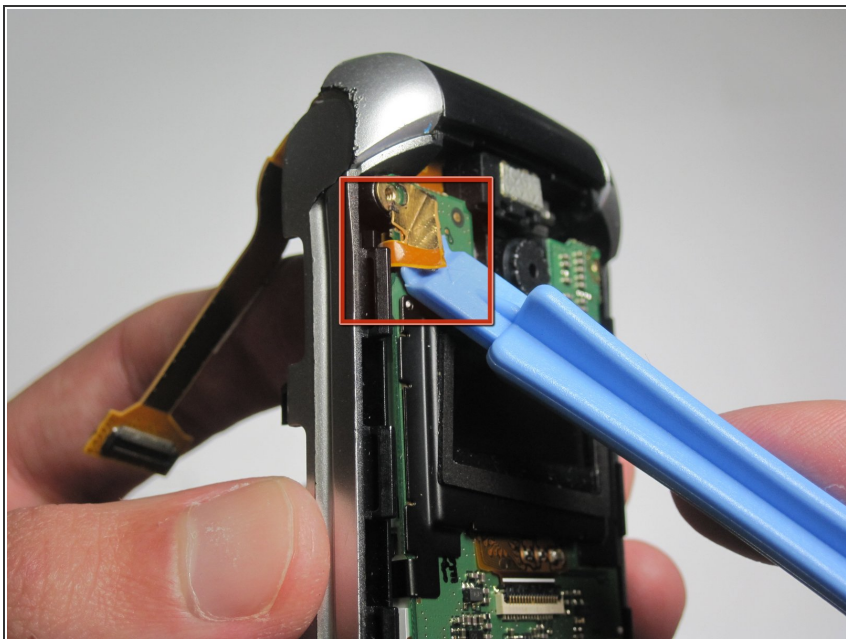

- Remove silver plate from phone.

Step 4

- Using the spudger remove the plastic camera casing

Step 5

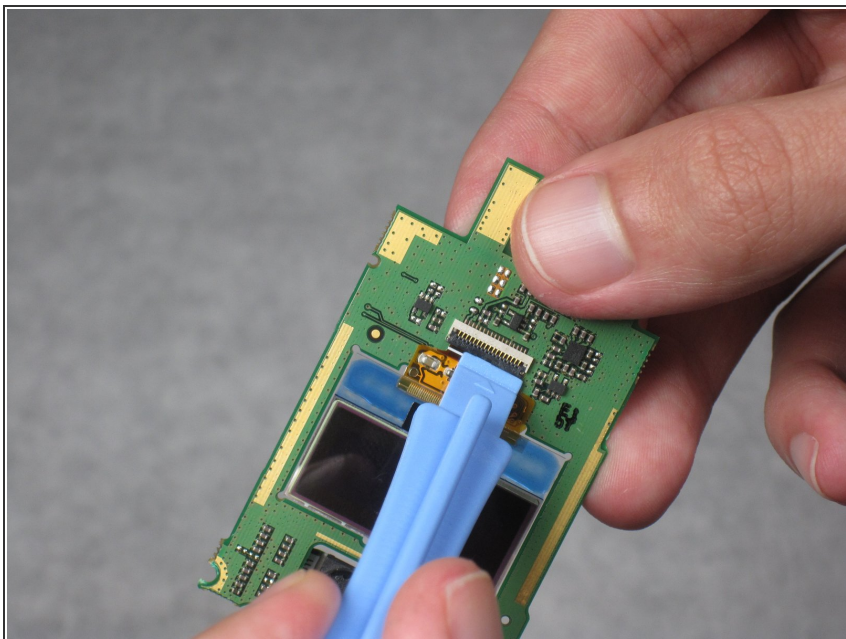

- Using the iPod Opening Tool remove the yellow flex cable from the green logic board.

Step 6

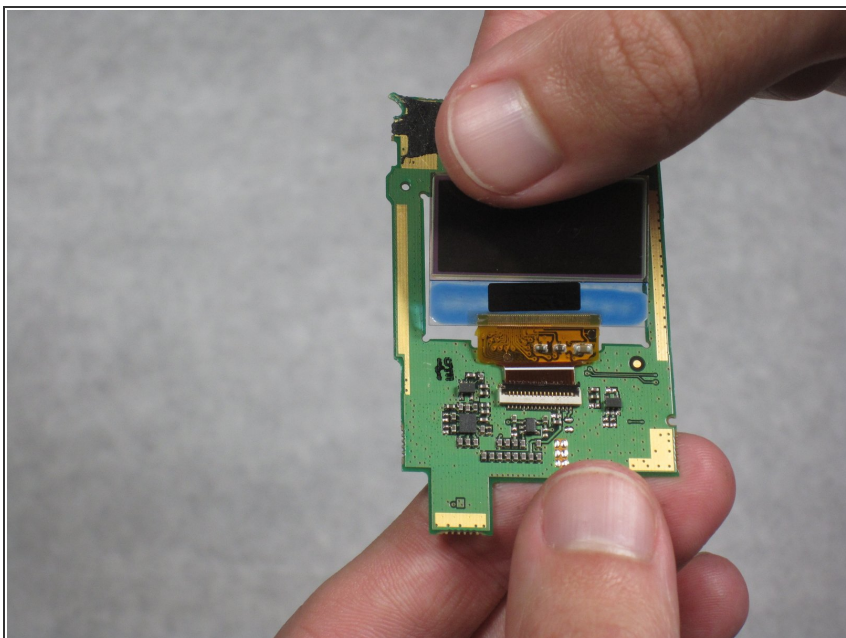

- Use Spudger or hands to detach flex cable from front screen logic board

Step 7 — Small LCD Display Screen

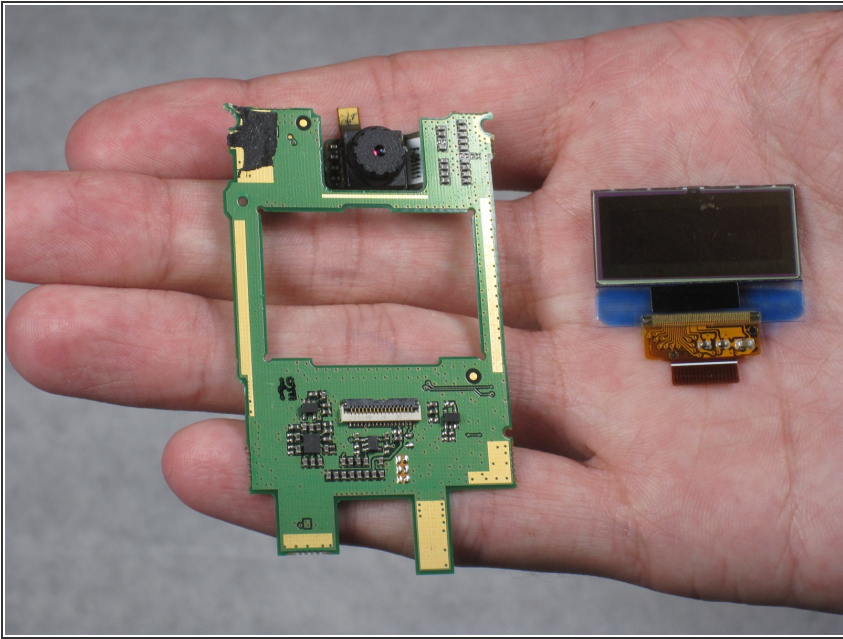

- Use a plastic opening tool to lift the small black flap to unlock the screen from the motherboard.

Step 8

- Using your fingers, carefully pull out the small LCD display screen.

Step 9

- Remove the small LCD display screen completely from the green logic board.

To reassemble your device, follow these instructions in reverse order.
