

# Nokia 6030 Charger Connector/Jack Replacement

Replacing the charger connector.

Written By: Spencer Woodworth

# INTRODUCTION

Replacing the charger connector.

## 🔧 TOOLS:

6-in-1 Screwdriver (1)

T6 Torx Screwdriver (1)

## Step 1 — Battery

- Press down on the grip on the back of the phone and slide the rear housing down towards the bottom of the phone.

## Step 2

- Use your finger to gently pull the bottom of the battery up by using the slip found at the bottom of the phone.
- Lift out battery and remove.

### Step 3 — SIM Card

- Use your finger to lift the metal cage up.
- Remove SIM card.

### Step 4

- Use your finger to close the metal cage.

## Step 5 — Front Cover

- Insert your two fingers under the two tabs found at the top of the phone underneath the black casing, then pull the casing up and slide it out slowly.

## Step 6

- After removing the top cover, turn the phone over so the screen is facing upwards.

## Step 7

- Use your fingers to slowly lift the screen back towards the bottom of the phone using the arrows found at the top of the phone.

## Step 8 — Charger Connector/Jack

- Remove the six screws with a T-6 Torx screwdriver.

## Step 9

- Lift the logic board and screen from the top.

⚠ Be careful of loose parts.

## Step 10

- Insert the screwdriver below the charger connector and press down to pry out.
- The charger connector should pop out with a slight push inwards with your thumb.
