HP HDX 16-1160US RAM Replacement

This guide will show the user how to replace the RAM

Written By: Marshall Reid

## TOOLS:

- Phillips #1 Screwdriver (1)

Step 1 — RAM

- Flip the device over so that the bottom side is facing up and use the Phillips #1 Screw Driver to remove the four 4mm screws on the cover panel.

- Lift the panel to remove it from the device.

Step 2

- Remove the RAM by placing your thumbs on the silver tabs on each side of the RAM stick and pulling the tabs away from the RAM stick.

  - (i) The RAM stick should "flip" up when it is released from its holders.

- Pull the RAM stick toward you to remove it.

- Repeat the above step to remove the second RAM stick
