

MacBook Pro 13'' Retina Display Mid 2014 MagSafe DC-In Board Replacement

Replace the MagSafe DC-In Board in your MacBook Pro 13" Retina Display Mid 2014.

Written By: Sam Goldheart

INTRODUCTION

Use this guide to replace a faulty MagSafe DC-In board.

TOOLS:	PARTS:
 P5 Pentalobe Screwdriver Retina MacBook Pro and Air (1) 	 MacBook Pro 13" Retina (Late 2013/Early 2015) MagSafe 2 DC-In Board
 Spudger (1) 	(1)
 T5 Torx Screwdriver (1) 	

Step 1 — Lower Case

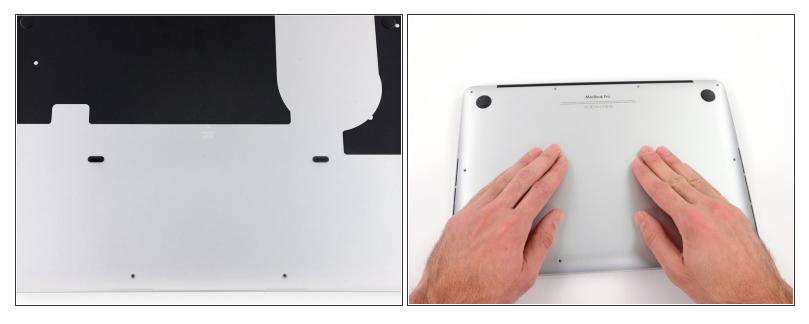

- Remove the following ten screws securing the lower case to the upper case:
 - Two 2.3 mm P5 Pentalobe screws
 - Eight 3.0 mm P5 Pentalobe screws
- Throughout this repair, <u>keep track of</u> <u>each screw</u> and make sure it goes back exactly where it came from to avoid damaging your device.

Step 2

- Wedge your fingers between the upper case and the lower case.
- Gently pull the lower case away from the upper case to remove it.

Step 3

(i) The lower case is connected to the upper case with two plastic clips near its center.

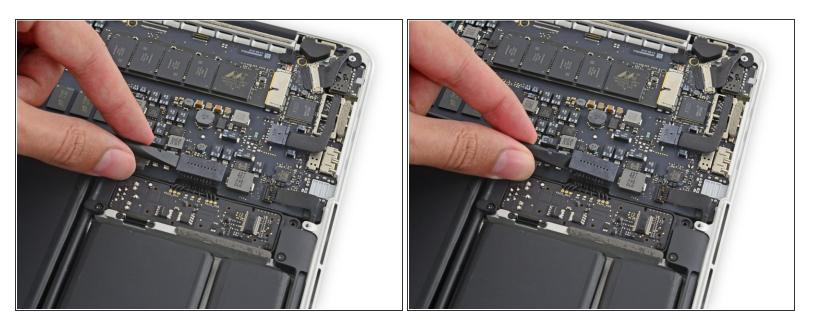

During reassembly, gently push down the center of the lower case to reattach the two plastic clips.

Step 4 — Battery Connector

(i) If necessary, remove the plastic cover adhered to the battery contact board.

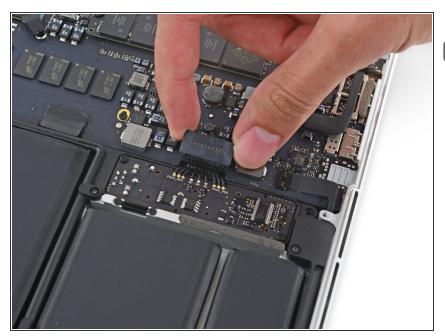

Step 5

 Use the flat end of a spudger to lift the battery connector straight up out of its socket on the logic board.

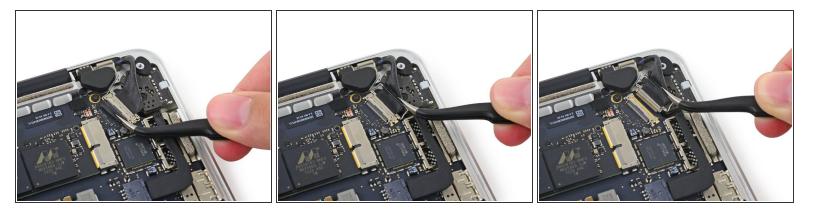

Be sure you lift up only on the connector itself, **not** the socket, or you risk permanent damage to the logic board.

Step 6

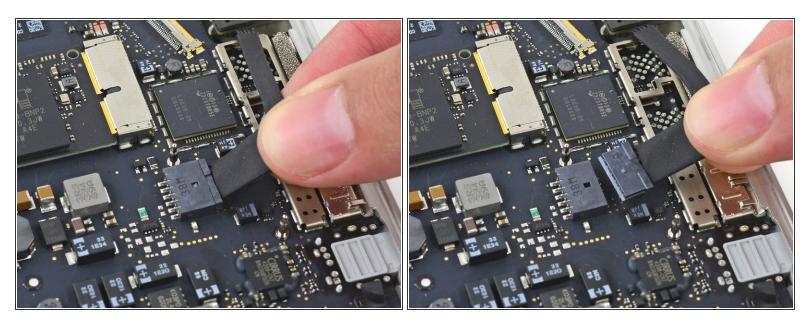

Bend the battery connector up out of the way to prevent accidental contact with its socket during your repair.

Step 7 — MagSafe DC-In Board

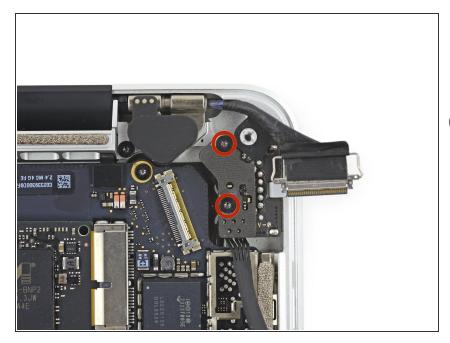

- Grab the black plastic tab to flip the display cable connector open and pull it straight out of its socket on the logic board.
 - Pull in the direction of the cable, parallel to the logic board. Do not pull up.

Step 8

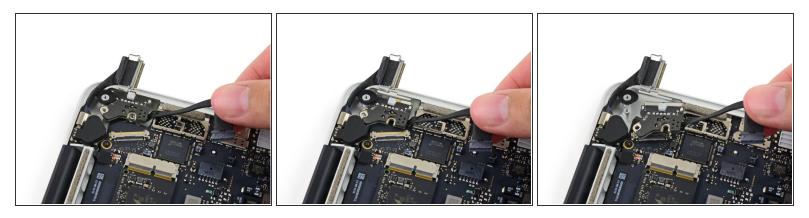

• Pull the DC-In board connector straight out of its socket on the logic board.

Step 9

- Remove the two 3.5 mm T5 Torx screws securing the MagSafe DC-In board to the upper case.
- (i) You may need to gently push the display cable out of the way to expose the screws.

Step 10

• Use the MagSafe DC-In board cable to pull the board out and up from the upper case to remove it.

To reassemble your device, follow these instructions in reverse order.
