INTRODUCTION

The motherboard is the most important part of the Jabra CRUISER2. It controls the device. This guide will tell you step-by-step how to remove the motherboard so you can replace it with a functioning one.

🔧 TOOLS:

- Phillips #000 Screwdriver (1)
- iOpener (1)
- iFixit Opening Tools (1)
- Microwave (1)
- Soldering Iron (1)

This document was generated on 2020-11-17 02:21:57 PM (MST).
Step 1 — Front Plate

- Use the iOpener tool to unglue the adhesive of the device. The link to the iOpener instructions are listed below.

- [iOpener Instructions](#)

Step 2

- Place the flat head of the bigger plastic opening tool in between the front plate and back plate.

- Pull the tool toward the back of the device to pry it open.

- Repeat this process over all edges of the device.
Step 3

- Open up the device by pulling the front plate straight up from the back plate.
Step 4 — Motherboard

- Carefully detach the wire running from the speaker to the motherboard by unplugging it from the white socket.

Step 5

- Using the PH000, unscrew the three 4.55 mm screws in the motherboard.

- The names of the screwdriver heads are listed on the sides of each head.

Step 6

- Remove the motherboard from the device by lifting it up from the back plate.

To reassemble your device, follow these instructions in reverse order.
