Step 1 — Battery Removal

⚠ Removing the battery while the laptop is still on may corrupt your files.
- Turn the device over to expose the bottom of the device.

- Slide the battery release all the way to the left.

- There will be a click and the battery will be released from its compartment.
|

Step 2

- Carefully remove the battery from its compartment.

Step 3 — Wireless Card

- Locate three Phillips head retaining screws which secure the compartment.

- Use a Phillips #0 screwdriver to loosen the retaining screws.

- Remove the panel covering the compartment.

- ⚠ Ground yourself before attempting to touch any components. To ground yourself, touch a conductive metal to eliminate any static buildup in your body, which can damage computer components.

Step 4

- Use tweezers to disconnect the gray cable and the black cable from the wireless card.

Step 5

- Use a Phillips #0 screwdriver to remove the single 4mm screw from the corner of the wireless card.

Step 6

- Carefully lift and pull wireless card. It is removed!

To reassemble your device, follow these instructions in reverse order.
