

Samsung Series 5 Ultrabook Hard Drive Replacement

This guide is the step by step process of how to replace the laptop's hard drive.

Written By: Timothy

INTRODUCTION

The hard drive is the main source of virtual storage for the laptop. All pictures, documents, and programs are located within it. This guide will show you how to replace a hard drive if it is not functioning. The hard drive cover will be removed to access the hard drive.

TOOLS:

- [Phillips #00 Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)
- [Magnetic Project Mat](#) (1)

PARTS:

- [1 TB SSD / Upgrade Bundle](#) (1)
- [250 GB SSD / Upgrade Bundle](#) (1)
- [500 GB SSD / Upgrade Bundle](#) (1)
- [2 TB SSD](#) (1)

Step 1 — Hard Drive

- Take out the four 6.7 mm screws that hold the hard drive and the mounting plate in place.
- ⓘ Keep these screws separate as they are a different size than the cover's screw.

Step 2

- Remove the hard drive from its location.
- Unplug the hard drive from the mother board.

To reassemble the device, follow the steps in reverse order.
