INTRODUCTION

Knowledge of how to remove the outer casing is necessary to replace it. (See guide)

🔧 TOOLS:

- Phillips #0 Screwdriver (1)
- Tweezers (1)

This document was generated on 2020-12-20 03:19:36 PM (MST).

Step 1 — Battery

- Find the hatch labeled "open" on the left side of the bottom of the camera.

- Slide the hatch in the direction that the arrow is pointing. The hatch will open outward on its own.

Step 2

- Slide the blue locking tab to release the battery.

- Slide the battery out of the camera.

Step 3 — Outer Casing

- Replace hatch and rotate camera 180 degrees. You should still be looking at the bottom of the camera.

- Remove the four 2.5mm Phillips #0 screws.

Step 4

- Turn the camera so the left side-panel reading "5x Optical Zoom" faces you.

- Remove the two 2.5mm Phillips #0 screws.

- ⓘ You may have to remove the screws with a pair of tweezers when the screws are almost out.

Step 5

- Turn the camera so the right side faces you.

- Remove the two 2.5mm Phillips #0 screws.

- (i) You may have to remove the screws with a pair of tweezers when the screws are almost out.
Step 6

- Rotate camera so that the back is facing you.

- Pull the back casing directly away from the LCD screen.

Step 7

- Turn the camera so that the left side is facing you.

- Pull the left side-panel off of the camera.
