## INTRODUCTION

This guide will assist you in replacing your thumbstick. If you have a rogue thumbstick, you have come to the right place.

### TOOLS:

[Spudger](#) (1)

### PARTS:

## Step 1 — Battery Pack

- Remove the battery pack cover.
- Remove batteries.

## Step 2 — Side Handles

 We recommend using a nylon spudger for this step. A metal spudger is shown.

- Grip the controller firmly to remove the side handles, wedging a spudger into the seam between the front and handle plates.
- Pry the side plate away from the front plate by moving the spudger back and forth. You will need to do this all the way around the side plate's seam.

### Step 3 — Screws

- ❗ There is a hidden screw located in the middle of the controller behind the label.
- Use a screwdriver and punch a hole directly in the center of the label.
- ❗ You may also lift the label if you do not want to puncture it.
- Remove the five 10mm screws located on the back of the controller using the TR8 **Security** Torx Screwdriver.

### Step 4 — Backplate

- Remove the backplate.

## Step 5 — Faceplate

- Remove the faceplate.

## Step 6 — Thumbstick

- Remove thumbsticks by pulling them up off their poles.
