

Sega Genesis Power LED Replacement

This repair guide wil give a walk through on...

Written By: Anthony Porchia

INTRODUCTION

This repair guide wil give a walk through on how to replace the power LED in a Sega Genesis.

TOOLS:

- Phillips #1 Screwdriver (1)
- 5mm 3.6v LED (1)

Step 1 — Outer Case

 Remove the six screws from the underside of the console with a Phillips #1 screwdriver.

Step 2

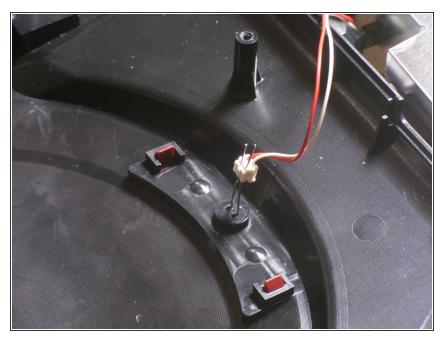

• Flip the Sega Genesis upright.

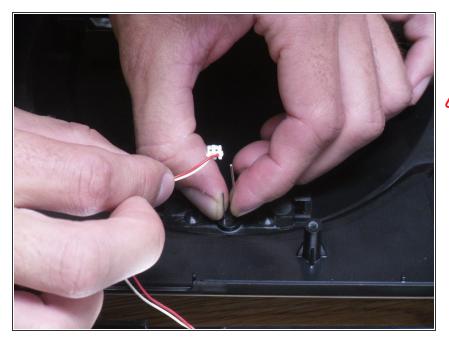

• Gently lift the top casing.

Note: the case will be connected to the main board by LED wires.

Step 4

• Bend out the LED leads into vertical positions.

- Slide the LED wire apparatus off the lead pins.
- Note: observe which color wire corresponds with which length of pin.

Step 6

• Separate the main board from the outer case.

Step 7 — Power LED

• Remove plastic "Power / On" cover by pushing tabs together.

Step 8

• Pull "Power / On" cover away from the console cover.

• From the outside of the top cover, remove LED.

Step 10

 Insert new LED (<u>Click here to buy</u> <u>LED.</u>)

• Re-insert "Power / On" cover until it clicks into place.

To reassemble your device, follow these instructions in reverse order.
