## INTRODUCTION

Daewoo DWC LDC1412S Water pump replacement Replacement

---

### TOOLS:

- [Phillips #2 Screwdriver](#) (1)
-

## Step 1 — Water pump replacement

- Turn the washing machine on its back

## Step 2

- Unscrew the 2 screws that keep the pump in place
- You can now gently tear down the pump

### Step 3

- Compare your actual pump with the spare you found BEFORE dismounting pipes !
- Seems ok ? Let s go forward !

### Step 4

- Dismount pipes by pressing steel rings and moving them out of range of the pump
- Do this for all pipes connected on the pump

## Step 5

- Pipes are now disconnected. Let's go for electrical connections

## Step 6

- Disconnect both electro pump. Check were is white wire and black wire on each !!

## Step 7

- Move last evacuation pipe on the new part

## Step 8

- ...you can know mount the new part and try your new pump !!

To reassemble your device, follow these instructions in reverse order.
