Step 1 — Battery

- Using a plastic opening tool, remove the thin plastic cover from back of the tablet by prying up from its small tab.

Step 2

- Remove the five 2mm screws on the back of the device using a PH00 screwdriver.

Step 3

- Pry the device apart by inserting a plastic opening tool in the seam between the plastic backing and display assembly. Use the tool to unclip the plastic tabs in between the backing and the display.

- Pull the the plastic backing off the display assembly using your hands.

⚠️ Do not do this step with only your hands. You will require a significant amount of force to separate the device.

Step 4
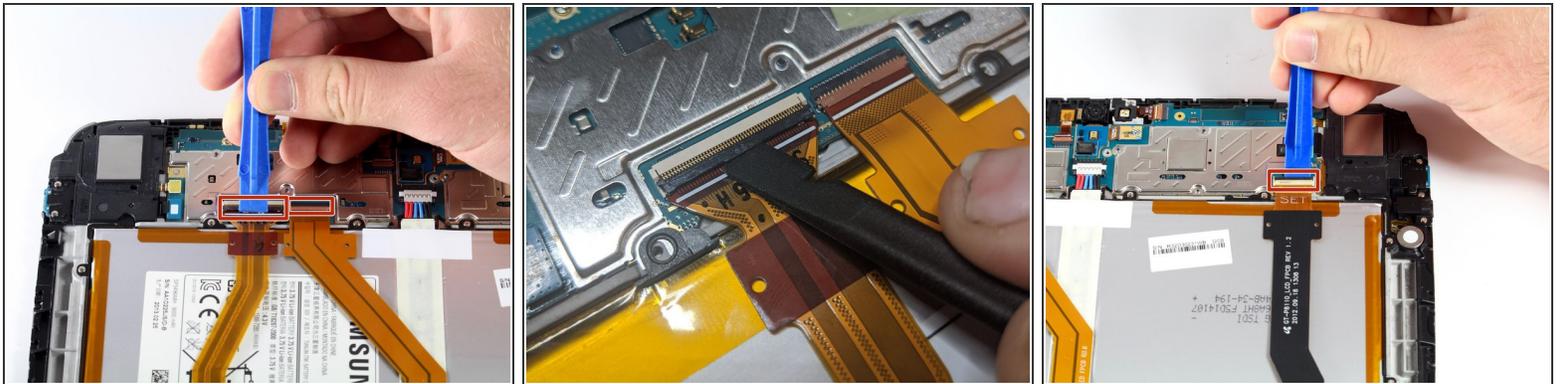

- Detach the three connector ribbons passing over the battery using the plastic opening tool.

Step 5
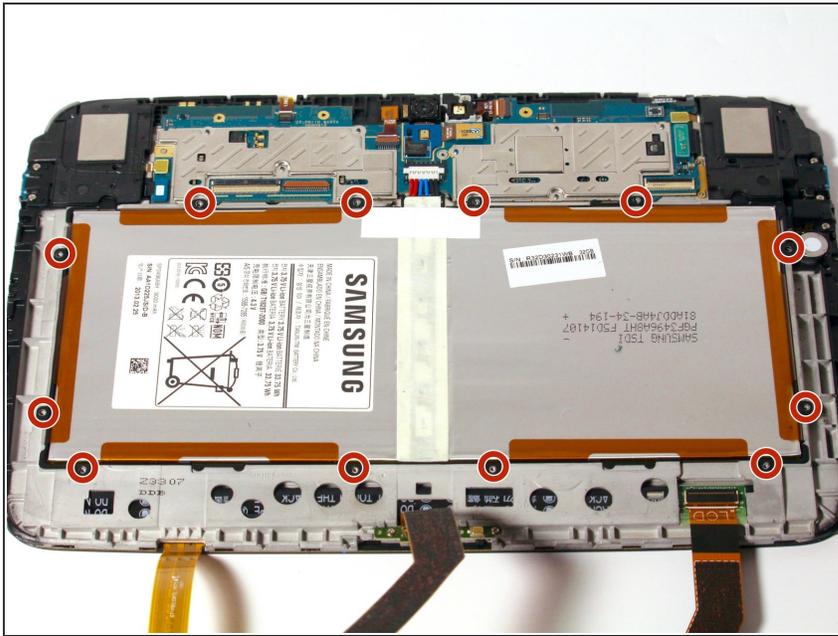

- Remove the twelve 2mm screws around the perimeter of the battery with a PH00 screwdriver.

Step 6
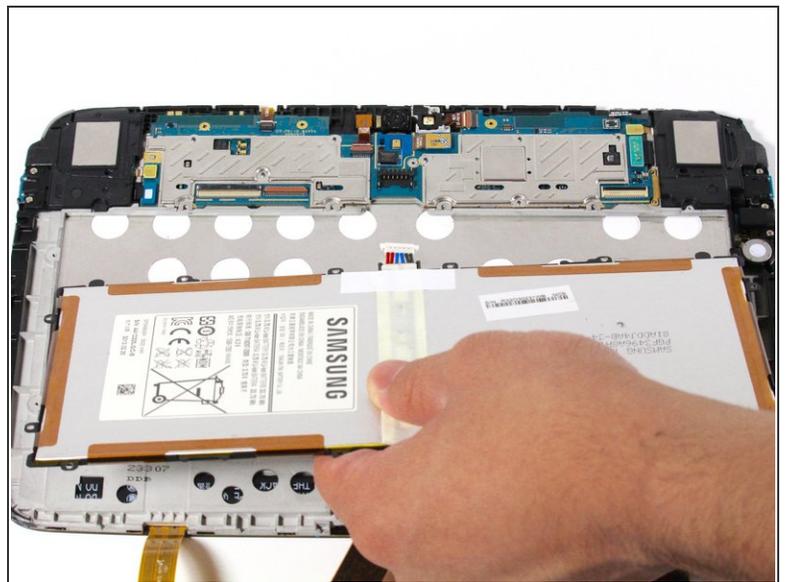

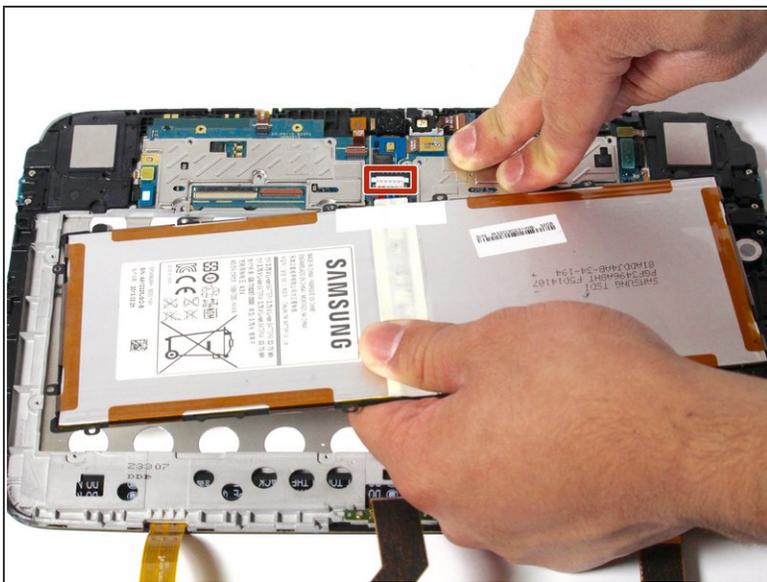

- Disconnect the battery by lifting it upward and pulling it away from the connector.

To reassemble your device, follow these instructions in reverse order.
