INTRODUCTION

This guide will explain how to install / remove the camera flash on the HTC Wizard 200.

🔧 TOOLS:

- iFixit Opening Tool (1)
- Spudger (1)
- T5 Torx Screwdriver (1)

Step 1 — Battery

- To expose the battery, remove the outer case with your fingernail.

- Remove the battery by pulling the black tab.

Step 2 — Back Panel

- Insert the flat end of the spudger into the two notches on the back of the camera cover and pry them up.

Step 3

- Work the [spudger](#) around the edges of the camera cover until it comes off.

Step 4

- Remove the four 6 mm screws with the [T5 Torx screwdriver](#).
- One of the screws is under the "void" sticker.

Step 5

- Insert the flat end of an iFixit opening tool between the side and inner covers to create a gap.

- Work the tool around the edges until all the clips release.

Step 6

- Once all the clips are open, remove the inner panel from the phone.

Step 7 — Camera Flash

- Use the spudger to pry out the camera flash module.

To reassemble your device, follow these instructions in reverse order.
