Step 1 — Canon PowerShot SX150 IS Battery Removal

- Locate the battery cover on the bottom of the camera.

- Slide the battery compartment cover the direction the arrow is pointing to open the compartment.

- Remove batteries.

Step 2 — Buttons

- Remove the two, 2mm screws from the top of the screen. Using the J000 screwdriver.

- Remove the 3, 5mm screws on either side of the camera. continue to use the same screwdriver from step 1.
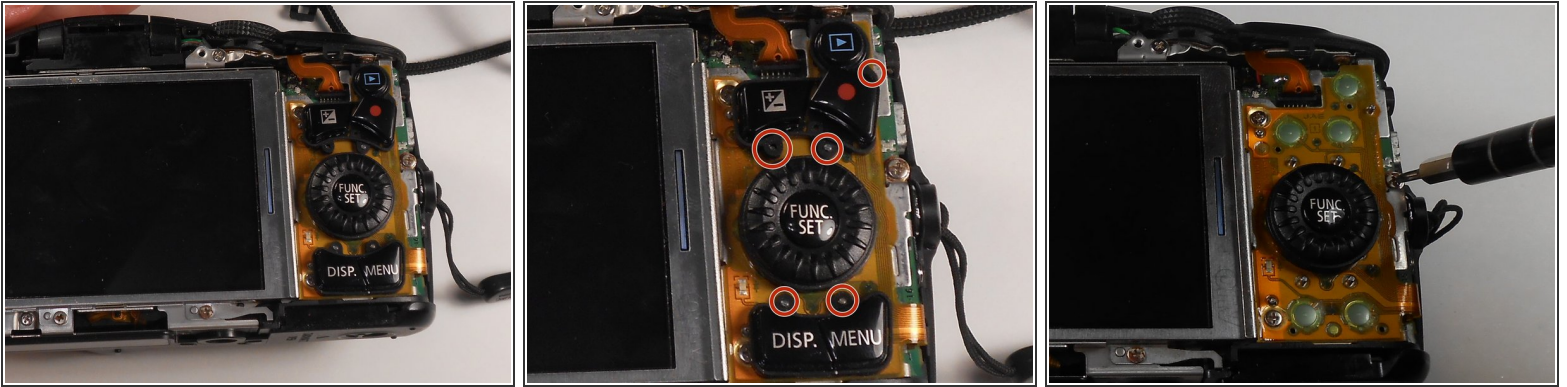

Step 3

- Remove the two, 4mm screws from the bottom of the camera. Continue using the same screwdriver from step 1.

Step 4

- Remove back plate from the camera and locate the orange button plate to the right of the screen.

Step 5

- Once the back plate is removed. Locate the buttons to the right of the screen.

- Using the tweezers carefully lift up the tabs connecting the buttons to the button plate.

- After lifting the tabs the buttons should come right off, then replace with the new button.

To reassemble your device, follow these instructions in reverse order.
