Step 1 — Back Panel

- Turn the Neo3DO face down so that the logo is facing toward you.

- Insert the plastic opening tool between the metal frame and the plastic back panel, as shown.

Step 2

- Gently pry the back panel upwards.

⚠ Ensure the tool does not slip into the device and damage the internals.

This document was generated on 2020-11-28 05:29:37 AM (MST).
Step 3

- Once the back panel has been pried away from the bottom and sides of the Neo3DO, lift the back panel up and away from the tablet.
Step 4

- When replacing the back panel, place the top edge of the back panel against the top edge of the Neo3DO, as shown.

- ⓘ The top edge of the device is the edge closest to the camera. The top of the back panel is the side with the hole for the camera.

Step 5 — Front and Back Camera

- Remove the front and back camera from their sockets.

- Remove the silver tape from the battery.

Step 6

- Remove the ribbon wire from the socket.

⚠️ Gripping the wire belt and pulling upwards may cause damage, be sure to avoid it.

To reassemble your device, follow these instructions in reverse order.
