# Canon PowerShot SD1000 LCD Screen Replacement

This is the removal of the Canon PowerShot SD1000 LCD screen in order to clean or replace it.

Written By: Phillip Phung

🔧 TOOLS:

- [Phillips #00 Screwdriver](#) (1)
- [Spudger](#) (1)

Step 1 — Back Panel

- Remove the two 2.9 mm screws from the side panel closest to the camera lens.

Step 2

- Remove the two 2.9 mm screws from the camera bottom panel.

Step 3

- Remove the two 2.9 mm screws from the side panel farthest from the lens.

Step 4

- Pull the back panel away from the camera body, starting at the end with the function buttons.

Step 5

- Remove the small cover panel and the attached wrist strap mount.
Step 6 — Front Case

- Remove the front cover by gently pulling it away from the camera body.
Step 7

- Place the front cover, back cover, and wrist strap mount in a safe place until you are ready for reassembly.
Step 8 — LCD Screen

- Remove the two 2.4 mm screws located at the top of the LCD panel.

Step 9

- Pull up the metal frame surrounding the LCD screen starting at the side of the camera.

Step 10

- Push the metal frame away from the metal tab using the spudger to detach the frame.

- Rotate the metal frame upwards.

- The metal framing should be attached by a metal tab towards the bottom of the camera, near the function buttons.

Step 11

- Carefully lift the metal frame from the camera.

- Remove the black LCD screen, leaving the thin lens pieces in place.

⚠ BE CAREFUL; both components are attached by an orange connector ribbon and cannot be removed yet.

Step 12

- Carefully pull on the orange connector ribbon to disconnect the LCD screen.

- The LCD screen can be pulled out of the frame before disconnecting its connector ribbon.

ⓘ Tweezers are helpful to disconnect the ribbon.
