## Step 1 — Back Cover

- Use an opening pick to unclip the rear cover, starting from the bottom corner.

- Work your way around counterclockwise and carefully pry the plastic tabs open one by one.
## Step 2

- (i) There is adhesive underneath the back cover that holds it to the battery and the metal plate at the top.

- ⚠️ Be careful with the flex cable at the right hand side.

- Twist the opening pick to lever the back cover away and loosen it from the adhesive.

## Step 3

● When the back cover is freed from the adhesive you can pop it off by hand completely.

## Step 4 — Motherboard Shield

● Remove the nine Phillips #00 screws that secure the metal shield plate.

ⓘ Some screws may be covered with tamper proof stickers. Remove them to ensure a proper seating for your driver.

## Step 5

⚠ Do not remove the shield plate yet, it is attached by a connector and an adhered cable.

- Use a spudger to disconnect the fingerprint sensor from the motherboard.

- Peel the NFC antenna cable off of the metal plate.

## Step 6 — Headphone Jack

- Disconnect the headphone jack with a spudger.

- Take the headphone jack out of its recess.

To reassemble your device, follow these instructions in reverse order.
