

Samsung Galaxy Note 10.1 2014 Battery Replacement

Use this guide to replace a nonfunctional battery in your Samsung Galaxy Note 10.1 2014 edition.

Written By: Joseph Rasico

INTRODUCTION

This guide will teach you how to replace a nonfunctional battery in your Samsung Galaxy Note 10.1 2014 edition.

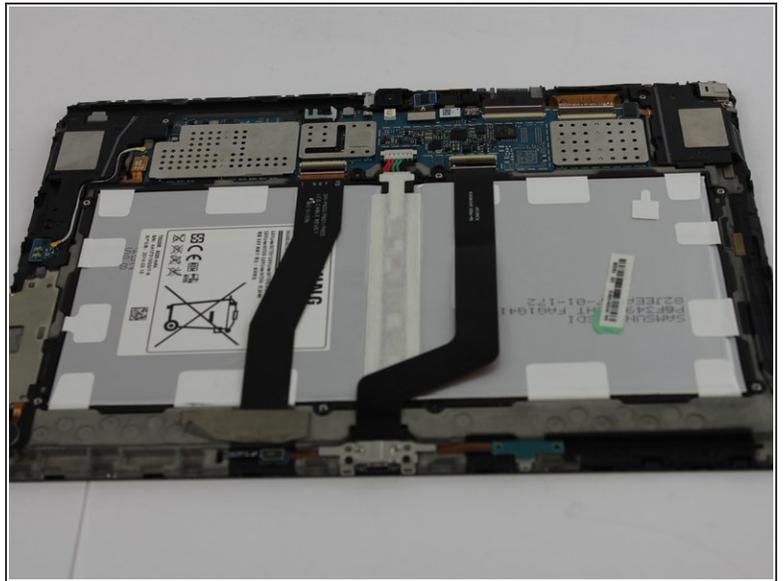

TOOLS:

- [Metal Spudger](#) (1)
- [Phillips #000 Screwdriver](#) (1)
- [Black Nylon Spudger](#) (1)

PARTS:

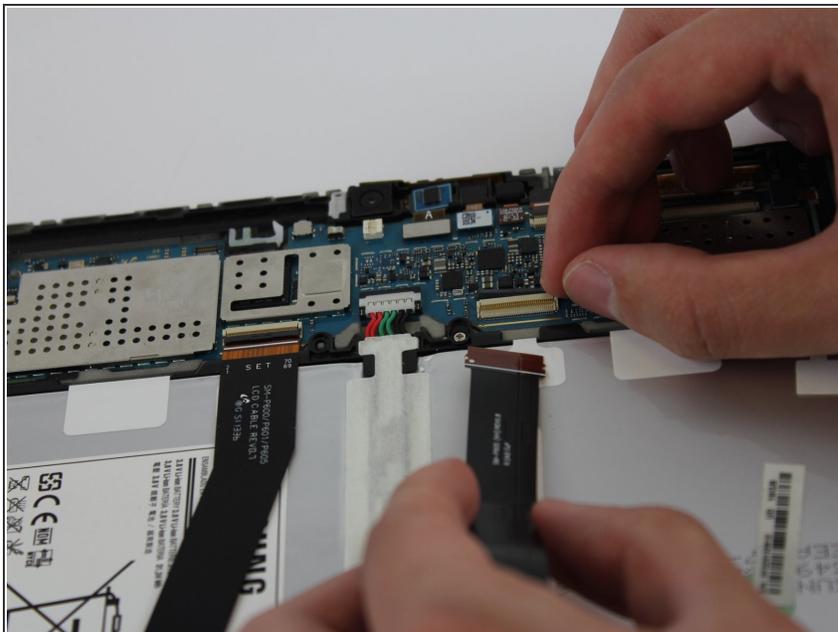

- [Galaxy Note 10.1 \(2014\) Battery](#) (1)

Step 1 — Case

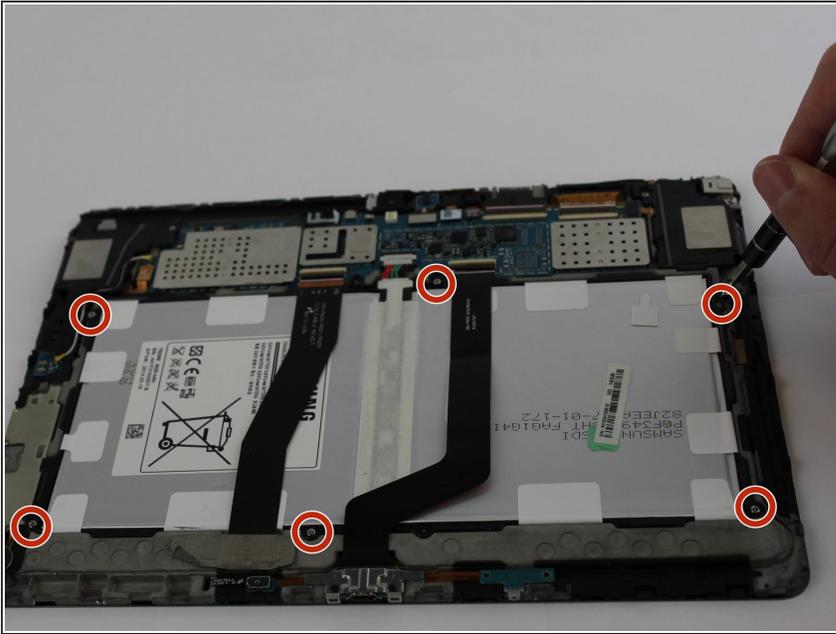

- Using the [nylon spudger](#) or [plastic opening tool](#) along the edges of the screen, separate the back case off of the device.
- ⓘ If possible, consider using the black nylon spudger for a gentler separation.

Step 2 — Battery

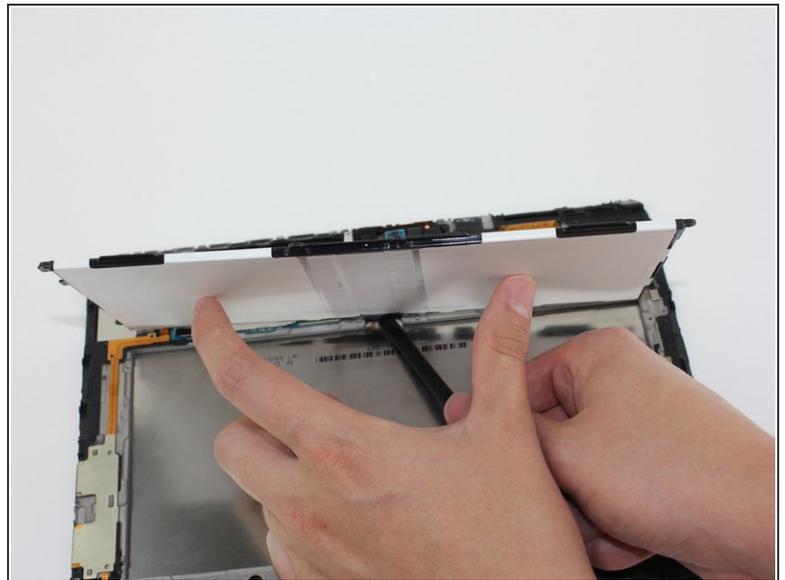

- Place your finger on the thin black bar at the end of the ribbon tape and flip each one up.
- Gently pull the ribbon tape on the battery away from the bar. Repeat this process for the second ribbon tape.

Step 3

- Remove the six 3mm screws around the battery with the [Phillips PH000 screwdriver](#).

Step 4

- Lift up the battery from the bottom and situate the [black nylon spudger](#) underneath the battery.
- Use the black nylon spudger to disconnect the multi-colored wires from the rest of the device.

To reassemble your device, follow these instructions in reverse order.
