

# Canon PowerShot S50 Right Motherboard Replacement

Use this guide to remove the motherboard on the...

Written By: Jacob

#### **INTRODUCTION**

Use this guide to remove the motherboard on the right side of the camera.

#### TOOLS:

Fingers (1)

Phillips #00 Screwdriver (1)

**Anti-Static Project Tray (1)** 

Spudger (1)

Tweezers (1)

## Step 1 — Battery

- Place camera LCD side up and press up on the battery door.
- Let it swing open until you can see the battery inside.

- Press down on the orange plastic.
- This will gently eject the battery from its compartment.

# Step 3

• Holding the edges, slide out the battery.

#### Step 4 — Front Panel/Battery Door

- Look at the camera from the side with the lanyard and 4 screws.
  - Remove the two 3.4 mm screws on the metallic colored part.

- Remove the 3mm screw on the top left.
  - i NOTE: When reassembling, it is helpful to put the top screw back in before placing the front cover back on the camera.
- Now remove the 5.3mm screw on the bottom.

- Place the camera LCD side down.
- Remove the two 5.3mm screws by the battery door.

- Remove the four 3.4mm screws on the bottom of the camera around the tripod mount.
- (i) Make sure to keep these screws separate from the previous 5.3 mm screws.

- Stand the camera back up.
- Remove the two 3.6mm screws on the side with the A/V Out port.

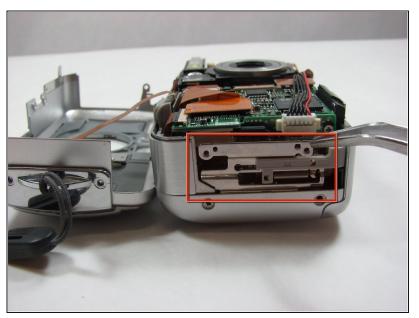

- Lift open the rubber flap covering the A/V Out port.
  - Remove the 3.4mm screw in the center.
- i During reassembly, put the A/V out rubber door on before replacing the front panel of the camera

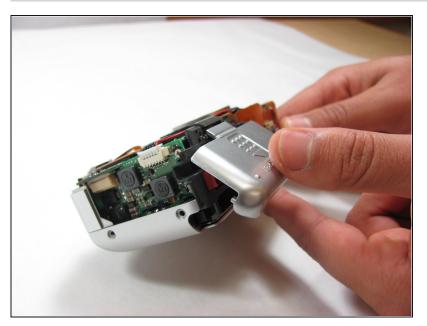

- Use a spudger and gently open up the front panel of the camera.
- A thin plastic ribbon will stay connected by a brown piece to front panel of the camera.

- There will be a brown plastic piece keeping the thin plastic ribbon in place.
- Use the spudger to pull out the brown plastic piece attached to the orange plastic.

• Use a pair of <u>tweezers</u> and remove the metal piece inside the camera.

- Remove the battery door
- i NOTE: Putting this back on requires aligning the spring on the back of the door with the hole on the camera

#### Step 14 — Right Motherboard

- Disconnect the two plastic ribbons on the lower half of the right motherboard.
- (i) NOTE: You will have to lift up the brown plastic piece in order to pull out the second ribbon wire.

#### Step 15

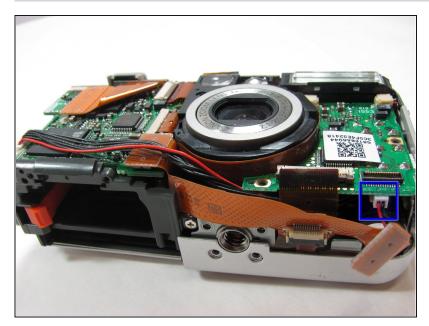

• Remove the two 3.4mm screws on the right motherboard.

• Disconnect the two wired plugs below the flash.

# Step 17

• Disconnect the wired plug at the bottom of the right motherboard.

 Use a pair of tweezers to pull the right motherboard away from the main body of the camera.

To reassemble your device, follow these instructions in reverse order.
