

Samsung Galaxy Tab A 10.1 Speaker Replacement

This guide will instruct you on how to replace the speakers of the Samsung Galaxy Tab A 10.1.

Written By: Isabella Li

INTRODUCTION

If there is no sound coming from your speakers, this guide will instruct you on how to replace the speakers.

TOOLS:

- [iFixit Opening Tools](#) (1)
- [Phillips #000 Screwdriver](#) (1)

PARTS:

- [Galaxy Tab A 10.1 Right Speaker](#) (1)
- [Galaxy Tab A 10.1 Left Speaker](#) (1)

Step 1 — Back Panel

- Have the front of the device facing you.
 - Begin near one of the curved edges of the device (see photo two for visual example).
 - Place a plastic opening tool between the front and back panels.
- ⚠ If a plastic opening tool doesn't work, using a metal spudger may work, but it may damage the plastic on the device.
- ⚠ Remember to remove the micro SD card (if present) before you begin.

Step 2

- Once the plastic opening tool is fully inserted, wedge it around the device's edges to separate the panels.
- Lift the back panel off of the device.
- i** The back panel will make a clicking noise while being lifted off of the device.

Step 3 — Disconnecting the battery

- Remove the adhesive film and flip up the retaining flap on the ZIF battery connector.
- Slide the orange battery ribbon cable out of the ZIF connector.

Step 4

- Remove the adhesive film, lift the retaining tab and withdraw the white speaker ribbon.

Step 5

- Lift the retaining tab and withdraw the black LCD ribbon.

Step 6 — Battery removal

- Using a Phillips #000 screwdriver, remove the ten 4 mm screws around the battery.
 - Slide a plastic opening tool under the bottom of the battery close to the speakers and lift up.
- ⚠ The large rectangular white and black piece is the entire battery. Be careful not to puncture it.

Step 7 — Speaker

- Use Phillips # 000 to remove the 4 mm .3 cm screw on each speaker.
- ⓘ If you encounter a stripped screw, see iFixit's guide on how to remove it [here](#).

Step 8

- Place the plastic opening tool on the edge of the speaker.
- Lodge the plastic opening tool under each speaker and lift them up and out of the device.

To reassemble your device, follow these instructions in reverse order.
