Step 1 — Cartridge Doors

- With the console on its top. Remove the four 12 mm Phillips #2 screws.

  ⓘ There may be a sticker covering one or more of the screws. Remove it before the screws.

- Flip the console on its feet, pinch near the AV/S ports, and carefully lift the top casing.

  ⚠ Do not completely remove the top casing. There is a small LED circuit board connected to the main circuit board.
Step 2

- Remove the one 6 mm Phillips #0 screw.
- Lift the top case and set aside.

Step 3

- Remove the eight 10 mm Phillips #0 screws.

- ⓘ The cartridge doors are spring-loaded and may pop up.

Step 4

- Carefully lift the cartridge door case and set aside.

Step 5

- Take the cartridge doors out of the top casing.

📌 Keep the correct cartridge doors together. Note the door numbers and position.
  - Doors numbered two and four are for NES cartridges.
  - Doors numbered three are for SNES cartridges.

To reassemble your device, follow these instructions in reverse order.
