INTRODUCTION

This guide will show you how to easily replace your optical drive.

🔧 TOOLS:

- Phillips #00 Screwdriver (1)

Step 1 — Battery

⚠️ Disconnect device from power source and power down.

Step 2

● With the device turned upside down, use your index fingers to push the battery latches in towards each other.

Step 3

- (i) The latch on your left will stay at the inward position, while the latch on the right will slide back out.

- Gently grasp the battery and pull it back away from the device and yourself.

Step 4 — Optical Drive

- Close the laptop and lay it down with the bottom facing up.

- Using a size #00 Phillips screw drive remove the screw holding in the optical drive.

Step 5

- Grip the optical drive and gently pull it out.

To reassemble your device, follow these instructions in reverse order.
